

## B. Campo Tencia peak ( 3702 m) to Croslina peak ( 3012 m )

Campo Tencia hut – Croslina peak – Campo Tencia peak

Campo Tencia peak is an incredible stone and ice pyramid that, from its height, offers a 360° view. Croslina peak raises over Campo Tencia hut like a titan, while from east it appears like an elegant pyramid.

From Campo Tencia hut you head towards south following the white and blue signage, until you reach a waterfall. To the left, you'll find a large path who leads to the ledge that crosses the whole wall to a well signed and exposed path, that goes up to the south-east reaching an easy crest.

Going south-west you will reach the little lake lying at the feet of Big Croslina Glacier remains and continuing on the small crest that divides the two Croslina glaciers you will reach the altitude of 2800m.

Following the white and blue signage in direction south west, going down the glacier, you will find the Croslina Pass (2687 m) and finally the cross that is located on the summit.

There is the possibility of traversing towards the Soveltra hut in the Maggia valley, descending from the summit direction southeast and following the white and blue signage.

How to get to the Croslina peak: from the depression, you will have to follow the blue points signage to the north-west, until reaching the ledge located on the right side of the obvious detrital slope. It is an exposed climb with rocky pitches of level II°.

For both routes, the descent is possible by the same itinerary.

### Technical characteristics:

Length: 3 km

Difference in altitude: 940 meters

Duration: 3 hours for one summit or 4 hours for both

Difficulty: T3/T4 Campo Tencia peak, T6 Croslina peak

To see: little lake, Big Croslina Glacier remains, amazing view from the top, Campo Tencia peak cross, Croslina summit peak edelweiss.
