

## D. Forno peak ( 2907 m )

### Campo Tencia hut – Senda del Ghiacciaio – Ghiacciaione pass

The Forno peak is a majestic pyramid at the ridge's far end and its summit, which overlooks the medium Leventina valley, offers a 360° view.

From Campo Tencia hut you slightly descend toward east/south-east on the Senda del Ghiacciaio Senda following the white and blue signage. This path will lead you to easily cross the steep north-east side of the Campo Tencia peak. Continuing broadly and almost horizontally, along the grassy and detrital slope located over the Bök di Comasné hollow, you will reach the other side of the northern spur of Poncione del Laghetto (2311 m).

Heading towards south east, through a detrital slope, you will reach the Ghiacciaione pass (2716 m). From there, bypassing to the right the crest's first section, you will enter the finale detrital slope that leads to the summit.

#### Technical characteristics:

Length: 4.5 km

Difference in altitude: 767 meters

Duration: more or less 3 hours

Difficulty: T3

To see: Senda del Ghiacciaio, Croslina pasture, Ghiacciaione pass, Barone peak.
